

## PROTECTION SERVICE FOR BUSINESS

**Protection Service for Business is the best, most comprehensive endpoint protection package on the market, designed from the ground up to solve your challenging business security needs.**

It protects all your endpoints, from Windows and Mac to mobile devices, against threats like ransomware, data breaches and 0-day attacks, without requiring significant maintenance or management overhead.

Protection Service for Business is the only unified multi-endpoint security solution that comes with integrated Patch Management, Mobile Device Management, and a Password Manager.

We are proven to provide superior and more consistent protection than our competitors, as verified by independent security experts. Thanks to our pioneering security technologies, such as real-time threat intelligence and advanced machine learning algorithms, we are always one step ahead of the attackers.

# COMPUTERS

**Protection Service for Business** provides powerful and modern security for your Mac\* and Windows endpoints. With tools like Patch Management and real-time threat intelligence provided through the F-Secure Security Cloud, your security rises to a whole new level.

## Supported OS:

Windows 7, 8, 8.1, 10  
OSX 10.10, 10.11, 10.12.1

## Advanced Anti-malware

Advanced anti-malware platform that uses multi-engine detection capabilities, offering vastly better security without being reliant on a single technology.

## DeepGuard

Offers proactive protection against 0-day malware and exploits through the use of heuristic and behavioral analysis.

## Lightweight

Minimal performance impact; can be used with both new and old hardware.

## Firewall

F-Secure Firewall uses default Windows engine to execute firewall rules, based on extensive list of advanced rules created by our penetration testers.

## Security Cloud

Our threat analysis and response systems provide our clients with real-time threat intelligence, allowing them to identify and respond to new threats as they emerge.

## Device Control

Enables control over USB-based devices, preventing data loss and malware infections via them.

## Patch Management

Automatic patching of 2500+ Windows and 3<sup>rd</sup> party software, with options for exclusions and manual updates. Blocks up to 80% of malware by preventing them from exploiting existing vulnerabilities.

## Web Protection

Provides extensive and proactive web protection; it blocks malicious content, and scripts, giving added protection for business critical web activity and preventing end-users from accessing malicious or phishing sites.
