

## PROTECTION SERVICE FOR BUSINESS

**Protection Service for Business is the best, most comprehensive endpoint protection package on the market, designed from the ground up to solve your challenging business security needs.**

It protects all your endpoints, from Windows and Mac to mobile devices, against threats like ransomware, data breaches and 0-day attacks, without requiring significant maintenance or management overhead.

Protection Service for Business is the only unified multi-endpoint security solution that comes with integrated Patch Management, Mobile Device Management, and a Password Manager.

We are proven to provide superior and more consistent protection than our competitors, as verified by independent security experts. Thanks to our pioneering security technologies, such as real-time threat intelligence and advanced machine learning algorithms, we are always one step ahead of the attackers.

# MANAGEMENT

Everything in **Protection Service for Business** is managed through a single cloud-based console. This includes deployment, management and monitoring of all endpoint security components, their profiles and integrated tools – saving you time in management and maintenance tasks.

## Supported browsers:

Latest Firefox, Safari, Edge, Explorer and Chrome.

### Centralized Management

Consolidates the management of all endpoint components and integrated tools into one cloud-based management console.

### Hosted Management Portal

Does not require the installation of management servers or special software, works on any device. Fully HTML5 implemented.

### Easy Deployment

Endpoint security clients can be deployed by email, local installation, batch script, or a domain-based remote installation tool.

### Uninstallation Tool

Conflicting security solutions are automatically removed during deployment of Windows clients, ensuring a smooth transition process.

### Policy Setting

Security policies can be created, customized, and assigned individually or in groups by using labels.

### Patch Management

3<sup>rd</sup> party software Patch Management can be set to work automatically on set dates, with the option to create exclusions or handle updates manually if required.

### Automatic Updates

Portal and clients automatically deploy product, security, and database updates, reducing maintenance work.

### Extensive Reporting

Detailed graphical reports, such as “most attacked clients” with threat details, vulnerability reports based on missing patches and more.

### Management API

Supports integration via API to SIEM, RMM or any other 3<sup>rd</sup> party auditing, management or reporting tool.
